Kellogg's Premier

The 12-Point Perfect Strawberry

Kellogg's Premier is the best June variety of all. It is the most reliable money maker. You can count on Premier for big profits. Note these 12 points of superiority.

- | | |
|--|---|
| <ul style="list-style-type: none"> (1) Extra early. Fruits before others. Gets the high prices. (2) Frost resister. Keeps right on fruiting regardless of frost. (3) Extra heavy fruiter. No variety can compare with Premier for quantity of fruit produced. (4) Long fruiter. Premier is one of the last varieties in the season to stop bearing. (5) Berries solid. Stand shipping to market extra well. (6) Beautifully colored. Red clear through. Attracts buyers. | <ul style="list-style-type: none"> (7) Beautiful shape. Note the berry below. Attracts buyers. (8) Best for canning and preserving. Retains shape and color better than any others. (9) Healthy. Resists disease. Seldom needs spraying. (10) Easy to grow. Premier succeeds under all conditions. (11) Bi-sexual. Does not require mat- ing. (12) Delicious. A fine table berry as well as a market berry. This is the final test that makes custom- ers come back again and again for more of your Premier berries. |
|--|---|

If you should tell us that you wanted to plant only one variety of strawberries and should ask us what variety to plant, we would unhesitatingly reply, "By all means plant Kellogg's Premier." We have more testimonials on the fruiting qualities and profits made from Kellogg's Premier than any other variety. Hitch your wagon to Premier and it will show you the way to big profits and complete satisfaction.

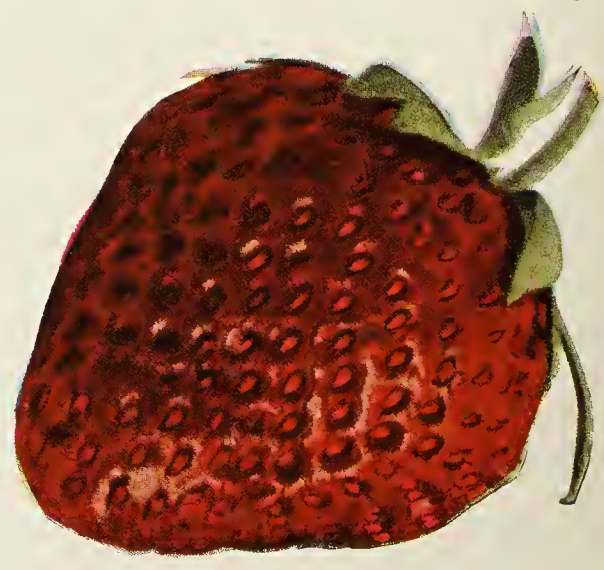

"We gathered from the 4000 plants Premier, shipped us in spring of 1928, 5389 quarts of extra choice berries. That is wonderful for one-half acre, don't you think? We never had to sort a single box of berries and the fruit was the finest choice fruit ever seen here."

GEO. N. LIGHT, Iowa.

CGIA A 190529

"I have been raising your Premier berries for 8 years. Been running around \$500 per acre. Last year I had a little over one-half acre that made between \$1000 and \$1100. Have had berries that measured five and three-fourths inches around. These berries are grown on prairie without fertilizer or irrigation."

C. B. DOSS, Okla.

R.M. Kellogg Co.

THREE RIVERS, MICH.

*Yes!
A Strawberry Plant
is A Strawberry Plant
But Read
this Letter*

Dear Friend:-

Yes, a strawberry plant is a strawberry plant just the same as paint is paint, men are men, and hens are hens; but some paint will blister and peel while other paint will stay put, and some men will give you a big honest day's work while other men are lazy and will loaf on the job. Some hens will lay 280 eggs per year, while others just eat and set.

It costs just as much to spread paint that blisters and peels as paint that stays put; and you usually pay as much for a man who loafs as for a man who gives a good, honest day's work; and hens that just eat and set, consume as much corn as the 280 egg hen

There is just as much difference in strawberry plants as there is in paint, men, and hens. You will find good, medium, and bad in everything produced by human efforts.

There are loafing strawberry plants and productive strawberry plants; the difference is in the human efforts. There are poor human efforts, good human efforts, and better human efforts.

Mother nature started the strawberry industry with the wild strawberry; but it was human effort -- through breeding, selection, restriction, and intensive cultural methods -- that developed the superior, heavy-fruited varieties we now have.

The Kellogg Way of growing plants for you is an extra human effort and it is this extra human effort that makes it possible for Kellogg Thorobreds to produce the 5,000 to 15,000 quarts of high grade berries per acre reported by our customers.

The quantity and quality of berries produced by strawberry plants depend upon the power of the plants. Deficient power results in a deficient crop. Abundant power, abundant crop. Kellogg Thorobreds, because of the extra human effort put into them, have the power and with proper care they will transmit this power into a big crop of the highest quality berries.

It's the same way with Kellogg fruit trees and other plants.

Sincerely yours,

J. E. Beatty

The world's oldest and most reliable strawberry plant nursery.

Over 50 years' experience in producing the world's finest strawberry plants.

Every plant a Thoroughbred—every plant a heavy yielder.

Every plant guaranteed to reach you in good growing condition or order re-filled free.

There is big money in Kellogg's strawberries.

9,127 QUARTS PER ACRE

"Last year I bought of you 1,000 strawberry plants and this year I picked 1,259 quarts of the nicest and biggest strawberries of anyone around here. Everyone spoke of what good crops we had."
—MRS. N. J. SESSELMAN, N. Y.

(7,250 plants are required per acre. Accordingly 1,259 quarts from 1,000 plants figures 9,127 quarts per acre as per heading above.—R. M. Kellogg Company).

A DECIDED DIFFERENCE

"I never knew there was such a decided difference between just strawberry plants and Pedigreed and Thorobred plants. Thank you for sending me such superior plants."
—C. O. DOTY, Illinois.

The First Half

Picking Blossoms.

Spraying.

Plowing under green crops.

When you buy fruit plants you are in reality hiring someone else to do the most important part of your work for you—the growing of the plants. You really give this person your money to spend, and you must see that the spending is well managed.

Undoubtedly we could save you a little money in the beginning if we left out some of these operations, but every operation has its direct beneficial result on the plants and on your final profits.

See how your money is spent to your advantage when you order plants of Kellogg—so that you will have big profits—not small initial savings. Kellogg's methods make Kellogg plants the cheapest plants you can buy.

By picking blossoms we keep fruiting power in the plants for you. By spraying we keep your plants healthy. By rotation of crops and plowing under green crops we create a healthful environment for the bringing up of your plants and provide healthful, nourishing food that makes them vigorous and robust. Kellogg plants have "get-up-and-go."

Irrigating, too, has its profitable effects—makes Kellogg plants capable of producing more money for you at fruiting time. Read this letter from Mr. Frazer of Kansas who bought plants of us in 1935:

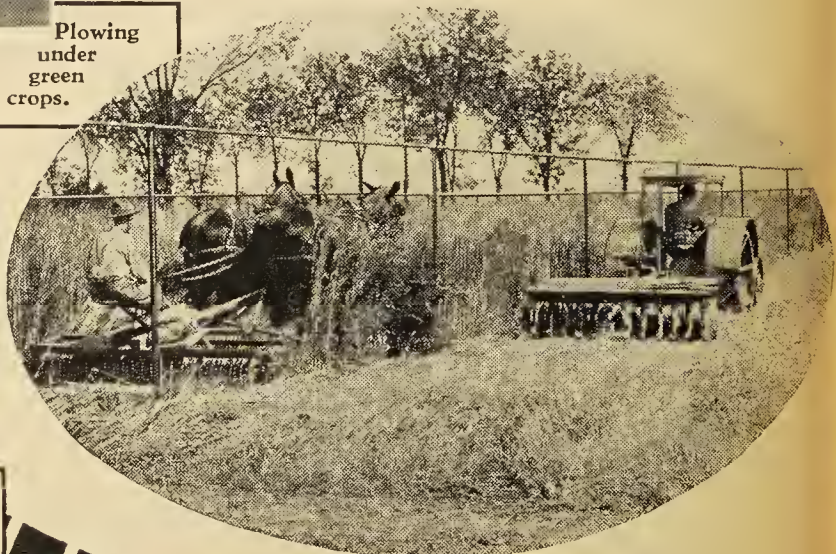

"The strawberry plants arrived in excellent shape, being well packed. Different ones who have seen them say they are the finest they ever saw. The home-grown plants are of very poor quality here this year."

Here is a picture of a Kellogg Thorobred Strawberry Plant as it came out of the ground. Note the strong, vigorous root system and general appearance of health and vigor. Such are the plants we grow for you.

Now, Kellogg Plants are priced lower than ever before.

Other plants may look as good as this, but will they fruit as well? Follow the arrow.

of Your Work is Well Done

Mr. Frazer's plants were grown during the hot, dry, trying summer of 1934, but on account of Kellogg's Overhead Irrigation System, they came through in ideal condition. Never did we see finer strawberry plants than were produced on our farms that season.

Cultivating and hoeing on the Kellogg Farms likewise makes money for you. The Kellogg Farms are known as the weedless farms. Kellogg plants are brought up only in their own good company. They get the full benefit of the soil's fertility. They are not robbed by vandal weeds.

But selecting the mother plants is probably the most important operation of all. Plants for the production of your plants are selected with great care. Only the most vigorous, healthy and robust plants are chosen as parents. There is fruiting quality in every one of them and this fruiting quality they pass on to the offspring which you receive.

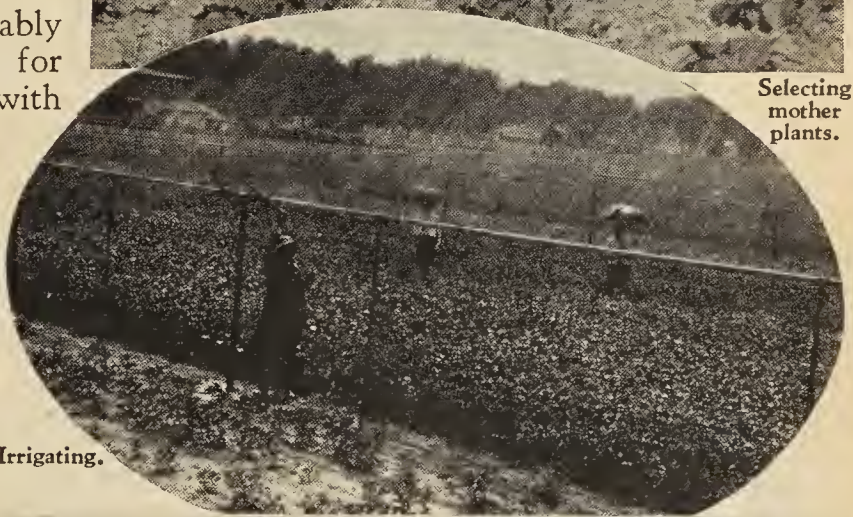

How would you like yields of 5,000 to 10,000 quarts of beautiful berries per acre? Such yields are often reported by Kellogg customers. Such yields will make money for you.

9,200 QUARTS PER ACRE

"I have been growing strawberries for the past 10 years and have always used Kellogg plants. This past summer I picked over 2,300 quarts from one-fourth of an acre. I had one bed containing 240 plants from which I picked 630 quarts."—Alfred Harrig, N. Y.

Selecting mother plants.

Irrigating.

Hoeing and cultivating.

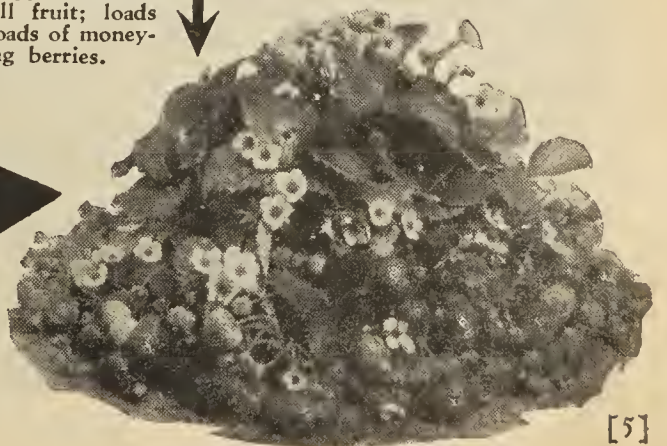

Preparing fertilizer.

Tons and tons of fertilizer are used in growing your Kellogg Thorobred strawberry plants; tons and tons of green crops plowed under. Only the best materials are used.

Yields of one quart per plant are common for Kellogg Thorobreds. Intensive culture sometimes brings as high as four quarts per plant.

This picture shows a Kellogg Thorobred in full fruit; loads and loads of money-making berries.

Here's the Greatest of All Everbearers

Kellogg's
TRADE - MARK

Big Sweet

(Wayzata)

Bi-Sexual.
Fruits Alone.

Everbearing Strawberry

New records for sweetness . . . new beauty of color and shape . . . new large size . . . new records for heavy bearing and profits . . . new value for market. This is the amazing new Strawberry that has come from Minnesota, the land of hardy, dependable Strawberries.

DELICIOUSLY SWEET. Here is the sweetest and most delicious of all everbearing strawberries. Flavor is sugary. Berries fairly melt in your mouth. Delicious for fresh-

from-the-vine eating.

BEARS HEAVILY. Makes a continuous red display of berries the first year from about August first to nearly November first, two more extra large crops second year.

BEAUTIFUL SHAPE, BEAUTIFUL COLOR. Berries extra large, very dark red, true top shape. Delight the eye and attract buyers at good prices.

HEALTHY VIGOROUS GROWER. Plants tall and bushy, large healthy leaves; makes just enough runners for a good fruiting row. This saves labor, with bigger crops of better berries.

BERRIES FIRM AND SOLID. Now market growers can improve their profits with "Big Sweet." The berries stand marketing just like standard varieties. Another step forward in the field of everbearers.

Rush your order for Kellogg's Big Sweet. We have less than 40,000 of these plants. This means you must hurry.

Prices: 12 plants, \$1.00; 25 for \$1.75; 50 for \$3.25; 100 for \$6.00; 200 for \$11.00; 300 for \$15.00; 400 for \$18.00; 500 for \$19.00; 1000 for \$35.00.

And Here's Catskill

Bi-Sexual.

The Mammoth New Mid-Season Variety

Premier and Marshall united to make this marvelous new strawberry. Berries are unusually large and brilliant red color with bright green cap—very showy—excellent seller—outsells both Dorsett and Fairfax. Plants vigorous, making wide row and producing many of its largest, finest berries in the widest sections. Exceedingly heavy

fruiter. Medal, Massachusetts Horticultural Society. Don't fail to order Catskill.

95¢**

"A year ago we bought a few strawberry plants from you. They have done exactly as you said they would and that was to bear large, beautiful and delicious berries. We had folks buy berries from us that travelled forty-five miles as they said they never saw such beauties."—Saxton C. Burdick, R. I.

"I have been a customer of the R. M. Kellogg Co. for several years, also my father has been for the past twenty or twenty-five years. We are boosters for Kellogg's because they put out the goods. Our plants have always arrived in live growing condition with plenty of stored vitality, so that they do not have to be nursed in a hospital half the season before they accumulate enough vitality to grow."—H. J. Clephane, Ind.

Senator Dunlap Gibson

Four of the most wonderful strawberry varieties that ever were originated. Senator Dunlap, Dr. Burrill, Gibson and Blakemore simply refuse to be downed by any of the newer varieties for which so many wonderful claims are made. And now they are to be had in Kellogg Thorobred plants at the amazingly low price of only \$3.95 per thousand—other prices for other quantities at right.

SENATOR DUNLAP. (Bi-sexual).

Strong, hardy grower and heavy yielder of big, solid, dark red berries. Has yielded better than 13,000 quarts per acre. Excellent for canning, delicious in every way. Fruits big crops in all soils and climates. A grand strawberry for gardens and market. Fruits in midseason.

DR. BURRILL. (Bi-sexual).

A most splendid midseason strawberry. Hardy, dependable grower. Extra heavy yielder of big, top-shaped, dark solid red berries. Wonderful for gardens and best of all for canning. A top-notch and real money-maker.

Segis Pietertje Prospect—World's Champion Milk Cow

Twice during her life she registered production records that set her fame above all dairy cattle of any age. In each of two years she exceeded 16,500 quarts of milk and 1,400 pounds of butter, yielding for the two years a total of 33,922 quarts of milk and 2,865.18 pounds of butter. She was owned by Carnation Milk Farms near Seattle, Washington, where these great records were made.

You cannot possibly get a well-bred cow with a big milk and butterfat record at the same price you would pay for a common ordinary cow. Neither can you get well-bred strawberry plants with a big fruiting and big profit record at the same price of common ordinary plants.

The prices we are quoting this year on Kellogg genuine Thorobred strawberry plants are lower than ever before and with such low prices, is it worth while to worry at all about the price you pay for plants? You get a big difference in heavy fruiting quality at only a very small difference in price, and in many cases inferior plants are to be found priced even higher than Kellogg's. With these new low prices there is no excuse for using the inferior plants that are so costly in the end. Plant the best and grow the biggest possible crops and make the biggest possible profits.

You may take your choice of the four varieties described here at the following extra low prices:

25 plants\$	0.29
50 plants47
100 plants68
200 plants	1.19
300 plants	1.59
400 plants	1.93
500 plants	2.34
1000 plants	3.95
2000 plants	6.95
5000 plants	16.89

Dr. Burrill Blakemore

GIBSON. (Bi-sexual). One of the hardest and most productive mid-season strawberries ever grown. Beautiful foliage; large plants literally covered with big bright cherry-red berries. Easily grown. A leading market berry and splendid for home gardens. A berry you can depend upon.

BLAKEMORE. (Bi-sexual).

One of the early strawberries that will put big profits into growers' pockets. A big, hardy, strong grower; produces big crops of large, round sparkling solid berries. Solid red from surface to center. One of the most beautiful strawberries ever grown. A real prize for the home garden and a big money-maker for the market grower.

\$594 FROM ONE-FOURTH ACRE

"We picked 2,700 quarts from only 2,000 Kellogg plants. Our average price was 22c per quart, which made us \$594 from the one-quarter acre."
—A. H. Reed, N. Y.

Thorobred Stock Pays Big Profits

Strawberry plants and other fruit plants, like Thorobred Cows and Chickens, can be made to produce extra heavy crops of fine, big red berries by proper selection of mother plants. The fruiting quality is born in the plant and is greatly strengthened by proper methods in growing your Kellogg Thorobred Strawberry Plants. Thorobred, heavy fruiting strawberry plants are just as important to the berry grower as Thorobred, heavy producing milk cows are to the dairyman. In either case, the profits are determined by the quantity and quality of the berries and milk.

Dorsett (Bisexual) See Picture on Front Cover

If there is any variety of strawberry on the market that can even compete with Kellogg's Premier in usefulness, it is this new Dorsett variety. Many growers claim that it is earlier than Premier and better. It produces loads of huge brilliant red berries of wonderful flavor. The fruit is very firm. It is a tremendous yielder and hence a wonderful market variety. Brings good prices on any market and is fine for home use. Whether you are growing strawberries for home use or market, we recommend that you try Dorsett. Better order early as the supply of this wonderful variety is limited all over the country.

Fairfax (Bisexual) See Picture at Right

Here is another new variety that every strawberry grower should try immediately. Like Dorsett, it is an early variety with very large exceptionally firm berries. These berries are deep red clear through and have a rich sweet flavor. One of the finest eating berries you ever experienced and the shipping quality is fine.

Dorsett and Fairfax are new varieties with a great future. They promise to displace many of the older sorts. Every commercial grower or home gardener should try them and the sooner you try them, the sooner your big profits will begin.

\$350 FROM ONE-FOURTH ACRE

"The 2,000 Kellogg plants you sent me were perfect. I did not lose a single plant nor were there any signs of disease of any kind. The 2,000 plants produced more than 2,000 quarts. My receipts in money were more than \$350.00. The plants cost me only \$17.00 which gave me more than \$20.00 for each dollar invested in plants."

Kellogg's Beauty . . . (Bisexual) See Picture at Right

Kellogg's Beauty is the amazing late variety that brings such high prices everywhere. Wholesale, retail and jobbing grocerymen clamor for Kellogg's Beauty berries. It is a real money maker to finish your season. It is the essential variety to grow with such other money makers as Kellogg's Premier, Dorsett and Fairfax.

Beauty is a heavy yielder of extra large, round, glossy berries; unusually solid, extra fine shipper. Tops the market wherever the berries are offered for sale.

The most delicious strawberry you ever tasted, extra sweet with remarkable flavor. Berries often measure 6 inches around.

A Kellogg Thoro-bred Ready for Planting

This is the kind of plants that you get when you buy of Kelloggs. Kellogg Thorobred Strawberry Plants are healthy, vigorous, and robust. They are the kind of plants that have "get-up-and-go." Kellogg Thorobreds are famous the world 'round for their ability to produce extra large crops of extra fine, money-making berries. Yields as high as 14,000 quarts of fine berries per acre and more have been produced with Kellogg Thorobreds.

Kellogg's Big Late (Pistillate)

Kellogg's Big Late is probably the most productive and finest of all late varieties. It is a variety that will really make money for you. Strong, hardy grower and extra heavy fruiter. Berries are big, glossy, sparkling and solid. The color is dark red clear through. Flavor delicious. One grower realized more than \$1,200 from one-half acre of Kellogg's Big Late. Mate it with Kellogg's Beauty for best results.

Gem will
fruit this
Summer
and
Fall

Here is what a basket of Kellogg's Big Red Gem looks like—all dolled up and ready for market. Gem berries always bring a good price because they are beautiful in color and shape and taste better, too, so that your customers always come back for more.

Gem berries are firm and solid and stand shipping and marketing well, comparing with many standard varieties in this regard. They retain their bright sparkling color long after picking. Do not bruise easily. They are sweet, luscious and delectable.

Gem starts fruiting three months after plants are set.

100 Progressive \$1.45

2000 plts.	14.25

The Home Everbearer

Delicious! That is what makes Progressive really the most worth while of all everbearing Strawberries for home use. It is surpassed by some others as a shipping and marketing variety, it is true, but direct from the vine to the table the berries are honey-sweet and luscious. Umm! Isn't Progressive shortcake good! Try it, or try Progressive fresh from the vine with sugar and cream. By all means include Progressive in your home garden.

Gem (BISEXUAL) the Mighty new Everbearer

Gem is the mighty new everbearer that now takes top place among all fall-bearing Strawberries and threatens seriously to rob standard or June-bearing varieties of their early summer glory. Millions of dollars will be made from this wonderful variety by growers in the next few years. So do not delay in ordering your supply of plants immediately. Prompt action will get you "in on the ground floor" so that the earliest profits, which are always the biggest, will be yours.

A grower in Northern Michigan discovered this amazing variety among a patch of everbearers and it was so outstandingly different and better than any other variety he had ever seen that he began propagating plants immediately. He found that the variety not only had wonderful eating qualities and wonderful marketing qualities—both unusual in an everbearer—but he found, too, that the plants could be propagated readily. Hence, now this new low price.

The plants are healthy, hardy, drought resistant, easily grown and productive. You will find Gem outyielding all your other everbearers and competing strongly with standard varieties in June. A few Kellogg's Gem plants will give you large quantities of choice berries this summer and fall. It is bi-sexual and does not require mating. By all means add this wonderful new everbearing variety to your order.

Don't forget Kellogg's Mastodon is an improved extra heavy bearing strain that has been known to produce nearly double other Mastodon plants, even under the hard, trying conditions of 1934's drought. Not one drone in a thousand. Will produce for you the biggest crop of big, fancy berries you ever have grown. Fruits this summer and fall.

Fruit This Year

Order Kellogg's two-year Raspberry plants and have fruit this season.

2 for 59c

3 for 79c

Kellogg's Raspberries and Blackberries

In buying your raspberry and blackberry plants, remember that the plants are mother to the crop, hence, the profits that you make depend upon the plants that you buy. Every Kellogg raspberry and blackberry plant is a Thorobred, clean, healthy, heavily rooted, true-to-name and hand graded for size and quality. Safe delivery guaranteed. You will double and triple your profits with Kellogg plants.

Thorobred Latham

Kellogg's Thorobred raspberry plants grow big and fruit heavily. This picture was sent to us by Mr. and Mrs. S. F. French of North Middleboro, Massachusetts, who are making a big success with Kellogg Thorobred Plants. These are the kind that make big profits.

ELDORADO Blackberry

See illustration on opposite page.

There is nothing more delicious than a good dish of blackberries and cream in the summer time or a wonderful blackberry pie. Order Kellogg's Eldorado blackberries for most delight. We have the purest and cleanest strain in the country. Eldorado is a big strong hardy grower and very heavy producer of big, jet-black, sweet, delicious berries. Seldom injured by frost. The big berries are produced in large clusters. Prices on opposite page.

CUMBERLAND Black Raspberries

See illustration on opposite page.

We all love good black raspberry jam, and we like black raspberries fresh from the vine, too. For the best and most reliable variety plant Kellogg's Cumberland. Our strain is the finest and healthiest we have ever seen. Cumberland is the best midseason black raspberry. Hardy, dependable, strong, tall grower. Extra heavy fruiter, large delicious berries. Succeeds everywhere, easily grown. Fine for home or market. See prices on opposite page.

LATHAM Red Raspberries

See color illustration on opposite page.

Here is the latest of all red raspberries and the most popular late red raspberry grown. The plants are hardy, healthy and dependable. Latham is a strong, tall, upright, sturdy grower. Berries extra large, bright red and delicious. A real money maker for market and a joy in the home garden. Extra long fruiting season. See prices of Latham on opposite page.

Downing Gooseberry

The most handsome and useful gooseberry grown. Fruit large and green with yellowish cast when fully ripened. Splendid for cooking and table use. Prices, 35c each; 2 for 59c; 10 for \$2.69; 25 or more at 25c each.

Perfection Currant

Very heavy bearer, bunches always well filled to the end. Brings highest prices. Best of all reds. Prices, 2-yr. plants, 28c each; 3 for 79c; 10 for \$2.00; 25 or more at 18c each.

Kellogg's Apples

63c Each

Prices, all Apples below except Gallia Beauty, 7/16" to 9/16", two-year-old trees: 1 for 63c; 3 for \$1.59; 10 for \$4.27; 25 for \$8.99; 100 for \$32.00.

BALDWIN. Large, bright red, pink flesh. Juicy and acid. December.

CORTLAND. An improved McIntosh, but two weeks later. November.

GRIMES GOLDEN. Fine yellow Apple, unusually good. Productive.

JONATHAN. Large red fruit; prolific early bearer. November.

MAIDEN BLUSH. Late summer. Large yellow with red cheek. Tart and good. August-Sept.

MCINTOSH RED. Large crimson fruit slightly acid. An extra good keeper and shipper. Greatly in demand by leading orchardists. October.

RED ASTRACHAN. Bright red. Delightful tarty flavor. July-August.

RED NORTHERN SPY. Genuine Northern Spy of vivid red. Top price, all markets. Extra good keeper and shipper.

RHODE ISLAND GREENING. Large, greenish yellow. Best Greening. November.

ROME BEAUTY. Large, uniformly red fruit. Fine for eating or cooking. November.

STAYMAN'S WINESAP. An improved Winesap combining rich aromatic flavor and beautiful coloring with greater hardiness and productivity. November-December.

SWEET BOUGH. Large, pale yellow. Flesh white, juicy, sweet. The best summer sweet. August.

YELLOW TRANSPARENT. Earliest standard eating Apple. Fruit large yellow. Flesh white and tender. Makes fine sauce or pies. July.

Gallia Beauty

Rome Beauty Improved. Threatens future of old strain. Can be picked two weeks earlier. Brings higher prices. Medium to late. Thick, tough, glossy skin; polishes readily. Color yellow overlaid bright crimson. Flesh creamy white. Fine grained, good quality. Pick late October. Matures midwinter. Keeps well. The coming Apple. Be the first to have it. Prices, \$1.00 each; 3 for \$2.25.

HYSLOP CRAB. A good all-purpose Crab Apple. Large fruit. All over red. August. Prices, 63c each; 3 for \$1.59.

Pears

69c Each

(Except Lincoln)
Other Quantities
Below.

Dwarf Apples and Pears

Plant dwarf trees in limited space 8 to 10 feet apart. You get the same size fruit as from larger trees requiring 30 to 40 feet distance. Bear very young. Do not obtain size of standard trees, but bear the same.

DWARF APPLES. We have the following varieties: Cortland, Delicious, McIntosh. Prices, your choice, 1 for \$1.39; 2 for \$2.58; 3 for \$3.77; 6 for \$7.19.

DWARF PEARS: Bartlett, Clapp's Favorite and Duchess. Prices, your choice, 1 for \$1.19; 2 for \$1.98; 3 for \$2.77; 6 for \$5.39.

BARTLETT. Large, juicy, rich flavored. Fine to eat out of hand, universally recognized as best canning Pear. Tree strong grower and prolific bearer. Bears September.

BUERRE BOSC. Large late Pear with long tapering neck. Russet in color. The best shipping Pear known. Bears October-November.

CLAPP'S FAVORITE. Very large and handsome Pear. Yellow with red cheek. The best of the large early Pears. Fair canner if picked before too ripe. Bears August.

KIEFFER. Large yellow Pear noted for its keeping quality. Tree very fast grower and bears young. Bears October.

SECKEL. Small fruit, light russet with red cheek. Very sweet and fine grained. Used extensively for pickling. Bears October.

SHELDON. A fine late fall Pear with slightly coarse, russet skin and melting, highly flavored fruit. Bears October.

Prices, all Pears except Lincoln, 7/16" to 9/16", two-year: 1 for 69c; 3 for \$1.69; 10 for \$4.78; 25 for \$10.29; 100 for \$36.98.

LINCOLN. Succeeds where others fail. Has all the fine qualities you could ask in a Pear. Fruit large, clear yellow, blushed red. Good canner, fine keeper. Tree fast growing, extremely hardy. Bears October. Prices, 1 for 79c; 3 for \$1.98; 10 for \$5.75; 25 for \$12.79; 100 for \$46.95.

Peaches 49c each

Peach tree prices, 7/16-9/16 inch, 1-year stock, 1 for 49c; 3 for \$1.39; 10 for \$3.97; 25 for \$7.79; 100 for \$24.85.

CHAMPION. The very best early white-fleshed freestone. Rich and juicy. Highly colored cheek. A favorite eating Peach. August.

EARLY CRAWFORD. Magnificent large yellow freestone Peach. Fine for eating or table use. A fair canner. Early September.

LATE CRAWFORD. Large, handsome Peach similar to Early Crawford except that it bears later and is more prolific. Freestone. September.

EARLY ELBERTA. Ripens a week before Elberta, which has won it much favor. Otherwise much the same as Elberta.

ELBERTA. Large, oval-shaped yellow freestone. Red cheek. Prolific and hardy. The leading market variety. Middle September.

J. H. HALE. The king of freestones. Flesh yellow and sweet. A good canner and shipper. Without doubt the largest commercial freestone Peach. Early Sept.

ROCHESTER. Large yellow fruit. Sweet and juicy. Skin is beautifully blushed red. An excellent fruit for market or home use. Freestone. Bears mid-August.

SHIPPER'S LATE RED. Round and beautifully colored red. Flesh yellow and sweet. Tree hardy and annual bearer. Fruit clings to tree tenaciously which eliminates droppage. September-October. Freestone.

SOUTH HAVEN. Exceptionally fine flavor. Flesh yellow and sweet. Its showy exterior combined with its earliness makes it a real money-maker. Freestone. September 1st.

Plums 74c each

Plum tree prices, 7/16-9/16 inch, 2-year-old, 1 for 74c; 3 for \$1.97; 10 for \$5.89; 25 or more at 55c each.

Japanese Plums

ABUNDANCE. Sturdy, upright growing tree. Fruit large, pinkish red. Bears young. Ripens August.

BURBANK. Tree grows rather flat, which makes picking easy. Very hardy and bears at an early age. Fruit large, red. Late August.

European Plums

FELLENBERG. (Italian). Good sized purple plum. A good canner and an ideal fruit for drying. September.

GREEN GAGE. Always a real favorite, either for canning or table use. Its high sugar content makes it one of the most economical sorts. September.

LOMBARD. Medium size. Fruit red. Very productive. This is a leading market variety and is grown extensively wherever plums are known. Late August.

GERMAN PRUNE. Extra large, dark purple canning plum. Flesh is sweet and delicious. September.

✓CHERRIES

Sweet | Sour
79c each | 59c each

Other Prices Below

Sour Cherries

Early Richmond. The "English Pie Cherry." Fruit medium size, red and juicy. Tree is strong grower and bears young. June.

English Morello. Dark red, firm fruit. Bears after other sour cherries are gone. Should be in every orchard. August.

Montmorency. The large red fruit is in big demand for canning and table use. A sure bearer under any ordinary conditions. Late June.

Prices, sour cherry trees, 7/16-9/16 inch, 1 for 59c; 3 for \$1.67; 10 for \$4.28; 25 for \$9.98; 100 for \$37.50.

Sweet Cherries

Black Tartarian. Large, rich black fruit. Very popular and a quick money-maker. June.

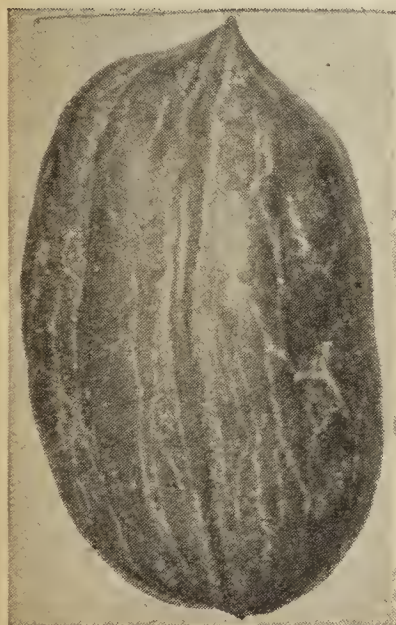

Governor Wood. Rugged growing tree; large, nearly round fruit of rich yellow suffused with red. June.

Royal Ann. Pale yellow fruit with red cheek. Flesh firm. Tree productive. July.

Schmidt's Bigarreau. Immense deep black fruit with dark flesh. Extra fine flavor. Tree stocky. July.

Windsor. A valuable late variety bearing large dark red fruit. Tree prolific grower. An extra remunerative market variety. Late July.

Prices, sweet cherries, 7/16-9/16 inch, 1 for 79c; 3 for \$1.99; 10 for \$5.35; 25 for \$12.50.

You Can Grow Hardy Northern Pecans

You can grow delicious pecans, the favorite nut of millions, if you use Kellogg's hardy northern grown stock. Not to be confused with the southern pecan. This is a different strain which does well throughout the North with no winter protection and with no trace of winter injury. Trees are somewhat drooping and make a fine lawn ornament. We advise planting them.

McCALLISTER HICAN. (Shown above, actual size). A cross between a Pecan and a Hickory. Tree grows rapidly, fully as hardy as a native Hickory. Leaves are large, dark green, thick and smooth; light bark makes them well suited for ornamental planting. Exceptionally large nuts, crack easily and yield good flavored kernels possessing much of the hickory flavor. Prices, hardy grafted stock, 5 to 7 feet, 1 for \$2.65; 3 for \$7.69; 10 for \$24.50; 100 for \$175.00.

HARDY NORTHERN PECANS. (Seedling stock). Ideal for those who feel they cannot afford the more expensive grafted Hicans. Nut is large, shell thin. Kernels come out freely and are usually plump and of fine quality. A safe strain for the North. Prices, 3 to 4 ft., 1 for 60c; 3 for \$1.67; 10 for \$5.00; 100 for \$40.00.

Native Black Walnut 57c

These native black walnuts are seedlings which will grow to fine big trees. They cost you little and are a bargain. Prices, 3- to 4-ft. trees, 57c each; 3 for \$1.49; 10 for \$4.35; 100 for \$35.00.

Stabler Black Walnuts, \$2.49

A fine ornamental tree bearing large, thin-shelled nuts with meaty, easily removed kernels. Thinnest shelled black walnut known. Very attractive, brings fancy prices. The most wonderful of all black walnuts for cracking. Prices, 5- to 7-ft. grafted stock, 1 for \$2.49; 3 for \$6.99; 10 for \$22.50; 100 for \$106.00.

JAPANESE WALNUT. Tree rapid grower with immense leaves. Both ornamental and productive. Nuts produced in clusters. Fine quality. Bears very young. Prices, 4- to 7-ft. seedlings, 1 for \$1.19; 3 for \$2.97; 10 for \$7.95; 100 for \$69.00.

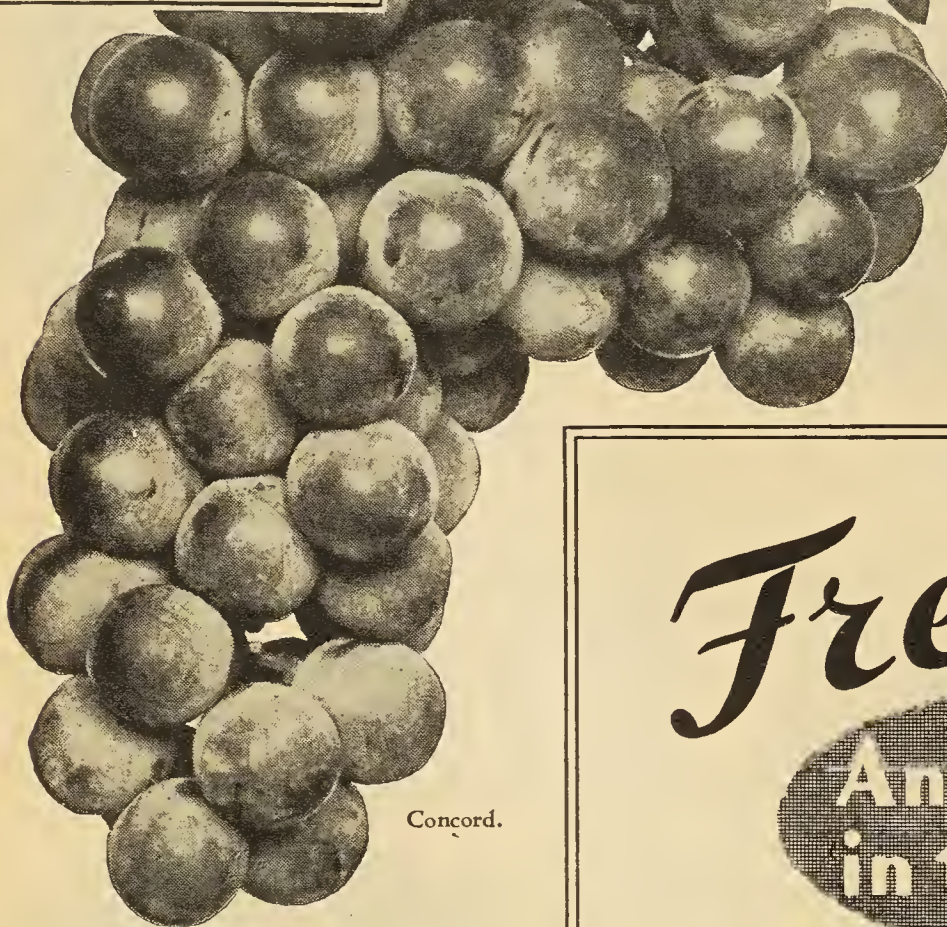

Concord Grapes

FINE 2-YEAR-OLD PLANTS

3 for 47c

1 for 19c; 10 for \$1.19; 25 for \$2.29; 100 for \$7.50. Large bunches of juicy sweet tender fruit, the standard of all grapes.

Other varieties of grapes described and priced below.

Concord.

Fine Two-year-old Grapes

BRIGHTON. (Red). Large, early, delicious. Dependable grower and producer. 35c each; 3 for 97c; 10 for \$2.59; 25 for \$5.99; 100 for \$19.95.

DELAWARE. (Red). Hardy grower, heavy producer of beautiful bunches of the most delicious flavored grapes you ever tasted. 34c each; 3 for 89c; 10 for \$2.37; 25 for \$5.65; 100 for \$19.67.

DIAMOND. (White). Good, hardy grower; heavy producer. Excellent quality. Large size. Always pleases. 25c each; 3 for 67c; 10 for \$1.79; 25 for \$3.75; 100 for \$12.95.

MOORE'S EARLY. (Black). One of the earliest black grapes. Peculiar sweet flavor. Hardy, good bearer. 25c each; 3 for 67c; 10 for \$1.79; 25 for \$3.75; 100 for \$12.95.

NIAGARA. (White). Most popular white grape. Large bunches. Hardy grower. Succeeds everywhere. Sweet and delicious. 25c each; 3 for 67c; 10 for \$1.79; 25 for \$3.75; 100 for \$12.95.

WORDEN. (Black). Very hardy, healthy and productive. Fruits early, surpassed by no other variety. Very popular family grape. 25c each; 3 for 67c; 10 for \$1.79; 25 for \$3.75; 100 for \$12.95.

Kellogg's Grape Arbor

7 Grape Plants—1 each of the varieties named above—**\$1.19** for only

The total value of this collection is \$1.88. It will save you money and give you loads of luscious Grapes for years.

GUARANTY

We guarantee all stock to be just as represented or orders refilled free. We also guarantee all plants, trees, and other stock to reach you in good growing condition or orders refilled free, providing complaints are made immediately upon receipt of plants. Should no reports be made within 10 days after receipt, it shall be mutually assumed that plants are satisfactory and no refill is warranted. Do not return plants unless so instructed by us.

Continued growth depends upon soil and climatic conditions, proper planting and care given plants—conditions we cannot control—hence is not guaranteed. We will, however, replace plants at half price if reports are made before October 1st of current season. Refills will be made during current shipping season if reports are received in time; otherwise during following season. Plants and other nursery stock can not be returned for credit and we accept no obligation for their return. It is mutually agreed that in any event we are not liable for more than the purchase price of stock.

R. M. Kellogg Company

Free!

Any \$1.00 Value
in this Catalog

If your order from this catalog does not amount to \$5.00, remember that you can also buy your flower plants and bulbs of Kellogg—the finest that can be grown. If you haven't a copy of our flower catalog, write for one—it's free!

with an order amounting to \$5.00 or more

You will have no difficulty at all in finding something in this book valued at \$1.00 that you would like to add to your order free of extra cost. We give the extra dollar value free with every order amounting to \$5.00 or more so squeeze your pocketbook just a little bit and bring your order up to size. Then just as soon as you have made up a \$5.00 order, go through the book again and select any dollar value that you want and add it to your order free of charge. You will have nothing to pay for the extra plants excepting the very small amount for parcel post or express.

WATCH YOUR ORDER

Often orders are received amounting to \$4.75, \$4.85 or similar amounts. A \$4.85 order for example, does not get the \$1.00 value free, but by simply adding 15c more to a \$4.85 order you make it amount to \$5.00 and get the dollar value free. 25c added to a \$4.75 order does the same; 35c to a \$4.65 order and so on.

All plants are guaranteed.

LET YOUR FRIENDS ORDER WITH YOU

If you haven't room for \$5.00 worth of plants, let your neighbor help you. Nearly everyone can use some fruit plants or trees and your friends will be glad to order with you and help you get the \$1.00 value free. Or when two persons order together this way, the

[20] premium plants can be divided between them.

Free!

NEW EARLY McIntosh Apple

\$1.00 Value

Parents, Yellow Transparent and McIntosh—just imagine the fine quality. Delightfully flavored; delightful to look at; fine round shape, handsome red. Trees vigorous, hardy, healthy, productive, bear annually. Earlier than regular McIntosh, about 10 days later than Yellow Transparent. Given free with a 10-tree or 12-tree orchard.

10 Trees, \$4.87

You get the following big value: 1 early apple, 1 late apple, 1 sweet cherry, 1 sour cherry, 1 early peach, 1 late peach, 1 early pear, 1 late pear, 1 early plum, 1 late plum, all for \$4.87. Regular catalog price \$6.48. You save \$1.61. In addition to this cash saving you get one new early McIntosh apple tree, value \$1.00, FREE.

12 Trees, \$5.97

You get the following big value: 1 early apple, 1 late apple, 1 sweet cherry, 1 sour cherry, 1 early peach, 1 late peach, 1 early pear, 1 late pear, 1 early plum, 1 late plum, 1 apricot, 1 quince, all for only \$5.97. Regular catalog price \$8.22. You save \$2.25. In addition to this big cash saving, we will include one new early McIntosh apple, value \$1.00, FREE.

Early McIntosh Free! Don't forget that you get one Early McIntosh apple tree, value \$1.00, free with a 10-tree and 12-tree orchard.

KELLOGG FRUIT TREES

All Kellogg trees have had two years' growth in the nurseries except Peach and one-year Peach is better than two. All big and sturdy with heavy roots and good branches as shown above. Safe delivery guaranteed on all Kellogg fruit trees.

How to Order

ORDER EARLY. Stock will be shipped at planting time. Early orders have preference at shipping time, hence, it is to your advantage to order early. January and February are none too soon.

PAYMENT in full should accompany all orders of \$5.00 or less. With larger orders you may send one-third with order, balance when you want shipment. No C. O. D.

SEND MONEY by postal, express or bank money order, or registered letter. Unregistered currency sent at your risk. Add five cents for exchange on personal checks.

SHIPMENT of most smaller orders, parcel post. Large orders usually go by express.

SHIPPING SEASON. All stock shipped at proper planting time. Early planting is best. Order early and let us ship early.

PLANTING INSTRUCTIONS sent free with each order.

CANCELLATIONS. Orders not subject to cancellation or change during shipping season. Plants not returnable for credit.

MARRIED WOMEN. Please sign your own and husband's initials, like this—Effie G. Smith (Mrs. R. B.).

ALL PRICES in this book expire June 30, 1936.

SHIPPING CHARGES. You are to pay shipping charges when shipment is received. On express shipments you pay express company upon delivery; on parcel post shipments you remit postage to us after shipment is completed, unless order is large, in which case we may ship C. O. D. for shipping charges only. This insures the plants and is a good plan. We do not send small parcel post orders C. O. D. for postage as this means unwarranted extra expense for you. Our method for these small orders is the fairest yet devised because you pay only the exact amount of postage.

Halehaven Peach

This new peach as two of the greatest peaches of all time for parents—the famous J. H. Hale and South Haven varieties. Originated at Michigan State Experiment Station, South Haven. **Often bears second year after planting.**

Halehaven now takes the same important place among peaches that Kellogg's Premier occupies among strawberries—an early, heavy yielding, frost resistant variety. **Two weeks earlier than Elberta.** Hardy! Comes through when others fail.

The flesh of Halehaven is thick, wholesome, and delicious—**perfect freestone.** Sells at high prices. **MONEY MAKER!**

Prices, 5/16 inch caliper,

Richmorency Cherry

Combines the best qualities of two famous cherries—Early Richmond and Montmorency. Fruits as early as Early Richmond, better flavor and quality than Montmorency.

Richmorency cherries are plump, juicy, meaty, and full of satisfying flavor. Undoubtedly will replace all other sour cherries in a very short time. Hardy as an oak, adapts itself to all soils and climates.

New Anoka Apple

The earliest and heaviest bearing apple in the world. Eight crops of apples at only 10 years old—2 bushels on a 7-foot tree—hardy in all climates—high quality, delicious fruit. **Anoka bears fruit in July and August, earlier than any other apple.**

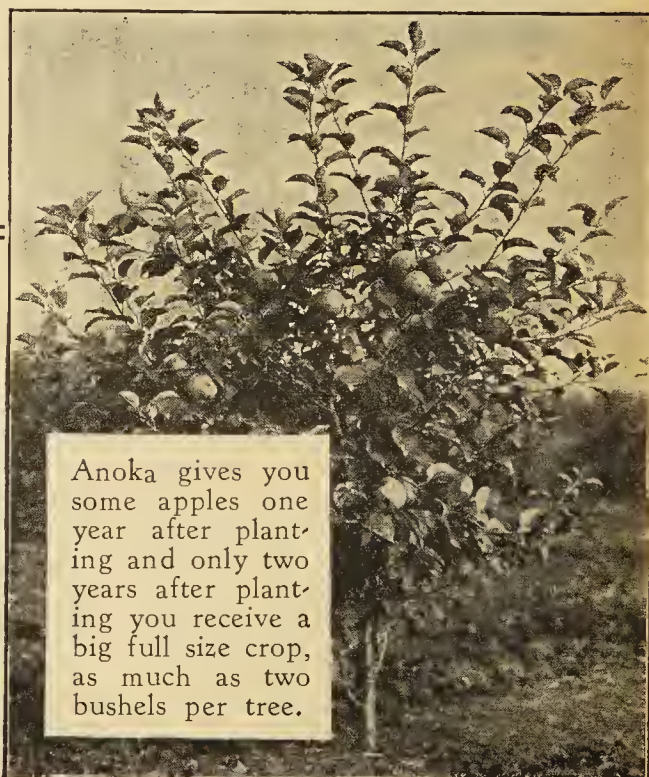

Originated in the Dakotas, Anoka is perfectly hardy and will survive the winter in all climates. Anoka is attracting world-wide attention because of its heavy, early and quick fruiting, and because of its high quality fruit.

ANOKA PRICES

7/16 inch caliper, 1 for 87c; 3 for \$2.25; 10 for \$6.50.

9/16 inch caliper, 1 for 99c; 3 for \$2.49; 10 for \$6.99.

11/16 inch caliper, 1 for \$1.29; 3 for \$2.99.

Anoka gives you some apples one year after planting and only two years after planting you receive a big full size crop, as much as two bushels per tree.

ANOKA Fruiting Heavily Two Years After Planting.

Orange Quince.

Orange Quince

Large and bright yellow. Can't be beaten for jellies, preserves, and quince honey. You can always find room for a few of these little trees and you will be more than repaid.
